CHICAGO, ILLINOIS 60604

REPLY TO ATTENTION OF:

**MEMORANDUM**

Date: March 22, 1991

Subject: U.S.S. Lead, East Chicago, Indiana, CWA Civil Action

From: Brett Warning *BW*  
Assistant Regional Counsel

To: Michael Mikulka, Chief  
Compliance Section  
Water Division

This memo is in response to your March 13, 1991 memo regarding the above-referenced site and on behalf of Charlie Gebien, On Scene Coordinator for the site who is at another site and is unable to write to you. After reviewing the Sedimentation Pond Design Summary submitted by a consultant on behalf of U.S.S. Lead, Charlie told me that he does not have any concerns with the sedimentation pond proposal from the perspective of the probable removal he is anticipating at the site. Charlie stated that he foresees no interference from the proposed sedimentation pond with the planned removal action. Furthermore, Charlie stated that the proposed sedimentation pond may be of some benefit to the removal action because it might be able to catch any possible run-off created from the removal action. Charlie also noted that the probable removal action will be conducted in a location on the site which is separate from the location of the proposed sedimentation pond.

cc: Charlie Gebien, OSC  
Dorothy Attermeyer, ORC  
Fred Micke, RPM  
Thad Slaughter, RCRA Enf.
